PROJECTS

Technician Service Application

The purpose of this web application is to create a centralized platform where users can easily find services from various types of technicians. For example: electricians, plumbers, computer technicians, car mechanics etc. Users will be able to book services easily, provide reviews and technicians can list their services. This will save users' time and increase work opportunities for technicians.
Tools Used: HTML, CSS, JavaScript, Node.js/Django

Head or Tail

Head or Tail Cricket Game is a fun dice-based cricket game where you play as Team A against an AI (Team B). On each ball, you choose a run (0–6); if your number matches the dice roll, you're OUT. The game features a scoreboard, overs system, innings mode, target chasing, sound effects, and background music for an exciting experience.
Tools Used: Java, XML, Firebase (Auth, Realtime Database, Storage)
